

# Managed Backup

Managed backup when you need it most

- Automated monitoring and notifications on all failed backups
- Proactive remediation to ensure backups are successful
- Monitoring and optimising effective storage utilisation
- Single point of contact for IT infrastructure and managed services
- Backup integrity tests
- Monthly backup status

## Product Overview

Many companies have the best intentions when it comes to their backup strategy. However, the best technologies always unravel when backups aren't monitored. The starting point of managed backup is our monitoring desk. All backups are monitored daily and in the event of a failure remedial action is taken.

In the modern data economy, an event that results in loss of data could prove catastrophic. Qwerti provides a fully-integrated, fast and secure way to back up, replicate and restore, whether your infrastructure sits onsite, in the cloud or in both locations, Qwerti Managed Backup delivers proactive monitoring as well as fast and flexible recovery.

Qwerti Backup offers an easy, redundant and secure way to save critical business data from ransomware, malicious and accidental deletion both internally and externally. We manage it on your behalf, so you don't have to worry. As a Veeam Gold partner, we offer world-leading backup software as part of our backup service offering, as well as cost-effective and secure cloud backup storage.

## How It Works

### Managed Backup

Qwerti's managed service engineers administer and monitor the backup, replication, and recovery processes. Customers receive a monthly managed backup and recovery service report detailing the status of backup jobs, along with all other information about the jobs.

### Onsite Physical or Virtual Server

Protect your physical or virtual Microsoft Windows and Linux-based servers using Qwerti Backup and Recovery software, that can backup data, files, applications and databases irrespective of whether onsite or in the cloud.

### Desktop Backup

Backup and recovery of an entire workstation image or individual folders.

### Office 365, SharePoint, OneDrive

Qwerti Backup for Office 365 eliminates the risk of losing access and control over your Office 365 data including Exchange Online, SharePoint Online, OneDrive for Business and Microsoft Teams.

### Single Management Console

With Qwert's single pane of glass management tool, you can closely monitor your backups and detect issues before they have operational impact.

### Onsite and Cloud Storage Options

Qwert offers fully managed onsite or cloud storage solutions including a hybrid model of both, ensuring best practice.

## Features and Benefits

### Monitored and Verified Backups

Daily monitoring of backups with intervention of consecutive backup failures.

### Assisted Restores

Managed restore in the event of a disaster.

### Storage Capacity Monitoring

Alerts if storage capacity is nearing its limit.
